

POSTER PRESENTATIE

UnrevalLIN met behulp van een conceptanalyse: Definitie en Input-Throughput-Output model van een Leer- en InnovatieNetwerk.

Marjolein Albers

11:30 – 12:00

The logo for AMSTA, featuring the word "AMSTA" in a bold, orange, sans-serif font. A thick purple horizontal bar is positioned below the text, extending slightly to the left and right. The entire logo is contained within a white circular background with a grey border.

AMSTA

The logo for inh, consisting of the lowercase letters "inh" in a white, stylized, sans-serif font. The letters are set against a bright pink circular background. The entire logo is contained within a white circular background with a grey border.

Conceptanalyse Walker & Avant

1. selecting the concept;
2. identifying the purpose of the analysis;
3. identifying all uses of the concept;
4. determining attributes of the concept;
5. identifying a model case;
6. identifying additional cases, such as borderline and contrary cases;
7. identifying antecedents and consequences; and
8. defining empirical referents.

Figure 1: Position of the LIN, NDU and DEU in the triangle of research, education and practice (constructed by the author)

Definitie LIN

Casusbeschrijvingen

Werkzame elementen

Definitie LIN

‘A group of care professionals, students and an education representative who come together on site and are all part of a learning and innovation community in nursing. They work together on practice-based projects in which they combine best practices, research evidence and client perspectives in order to innovate and improve quality of care and in which an integration of education, research and practice takes place’

INPUT

Antecedents

- Increasing complexity of work
- Change in involvement of stakeholders
- A (future) shortage in staff as impulse to invest in the education of nurses
- Conditions for communication
- Time and space to learn
- Openness to change
- Active members who produce their own learning process
- Equal distribution of engagement
- Mutual aim

THROUGHPUT

Attributes

- Co-creation
- Working together in daily practice/ co-production
- Social learning
- Practice-based research

Empirical referents

- Collaboration between nurses, nursing students, teachers, clients and researchers
- Reflection exercises
- Bedside teaching
- Critical questioning
- Nurses teach classes in the educational institution
- Regular evaluation
- Experimenting
- Peer review

Deducted from model case

- Clinical reasoning
- Implementing new findings

OUTPUT

Consequences

- Improved learning climate
- Understanding of the language and culture of other professionals
- Further integration of education, research and practice
- Innovations in daily practice in favor of clients
- Enhancements in care and curriculum
- Attractive workplace for employees and students
- Improved evidence-based practice
- Increased number and quality of apprenticeships
- More competent teachers and students
- Care professionals challenge themselves
- Rebuild identity
