Deadline for manuscript
submissions:

21 August 2020

Message from the Guest Editor

This Special Issue welcomes studies and reviews that consider the perspectives of several stakeholders on technological innovations for chronic disease conditions. All chronic conditions can be addressed. As for stakeholders, especially from the perspectives of patients, their informal and formal caregivers that make use of innovative technologies that are used to support the autonomy and self-management of patients with chronic health conditions, both community living and in nursing homes, are important. In addition, the perspectives of other parties who are part of the studies of the views of (informal) caregivers and patients with chronic diseases, are appreciated. The goal of this Issue is to provide an overview of what it takes, starting with the primary stakeholders, to establish sustainable, personalised chronic health care that improves quality of life and quality of health care.

This Special Issue will provide readers with state-of-the-art theory and practical information on human and social perspectives that determine the uptake of technological innovations in the daily life of persons living with a chronic condition.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 19 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in 2018).
